

DATA POLICY | RECCAP2-ocean

Adapted from from RECCAPv1

The project will involve scientists from a large number of independently funded research projects. To ensure the individuals and teams that provide model output and data receive proper credit for their work, we have instituted a Fair Use Policy. The policy applies to all data and model output stored at the common data server. The Fair Use Policy is based on the Ameriflux Policy, but expanded to include all RECCAPv2 participants:

The data and model output provided on this site are freely available and were furnished by individual scientists who encourage their use. Please kindly inform in writing (or email) the appropriate participating scientist(s) of how you are using the data and of any publication plans. If not yet published, please reference the source of the data or model output as a citation or in the acknowledgments. The scientists who provided the data or model output will tell you if they feel they should be acknowledged or offered participation as authors. We assume that an agreement on such matters will be reached before publishing and/or use of the data for publication. If your work directly competes with an ongoing investigation, the scientists who provided the data or model output may ask that they have the opportunity to submit a manuscript before you submit one that uses their data or model output. When publishing, please acknowledge the agency that supported the research. We kindly request that those publishing papers using RECCAPv2 data or model output provide the publication to the appropriate scientist providing the data or model output at the time of manuscript submission.
